

I am opposing FCC weakening Indiana's law for the No Calls from my banks, charge card co, etc. I do not want these companies to call me. If I need something from them, I will call them. In fact I just told one of my charge card Co. to stop calling me, I am on a No call list and do not want those sales calls. I even told them I would contact my Attorney and press harrassment charges, funny, they haven't called me since then. I think it's a shame that a family can't sit down to dinner and not be intrupted by these people and they are even calling up until around 9 P.M. or call and get a person by 8:00 am on a saturday morning. Please do not let this continue. Help the people that wish to not want these calls.
